EDUCATION

Bina Nusantara University - Bekasi Region
Bachelor's Degree in Software Engineering

- Relevant Coursework: Data Structures, Computer Network, Scientific Computing, Cloud Computing, Software Security
- GPA: 3.52

EXPERIENCE

Laboratory Assistant **February 2026 - Present**

- Supported and facilitated 44 laboratory sessions across Full-Stack Development, Algorithms, and Computational Physics, providing technical guidance and hands-on assistance to students in completing coursework, implementing programming solutions, and applying discipline-specific concepts.
- Guided students through programming exercises and technical assignments by breaking down complex concepts into clear, actionable implementation steps, enabling them to develop a stronger understanding of programming fundamentals, algorithmic thinking, and computational methodologies.
- Diagnosed, analyzed, and assisted in resolving programming errors, logical inconsistencies, and implementation issues, helping students strengthen their debugging techniques, analytical reasoning, and independent problem-solving capabilities.
- Facilitated practical, hands-on learning experiences by bridging theoretical knowledge with real-world technical applications, encouraging students to translate abstract concepts into functional code, algorithmic solutions, and computational implementations.
- Assisted students in understanding software development workflows, algorithm design principles, and computational problem-solving techniques, reinforcing their ability to approach technical challenges systematically and develop reliable solutions.

Assistant Manager of Binus English Club / Brand Management Division **September 2025 - Present**

- Coordinated club activities and organizational initiatives, supporting project execution and alignment with organizational objectives.
- Oversaw the production of 50+ club design assets, maintaining visual consistency and adherence to established design standards.
- Served as Vice Project Manager for The Extraordinary Festival Seminar, Workshop, and Talkshow, supporting cross-functional coordination and event execution.
- Led the Design Division for New Member Recruitment and the Welcoming Party, coordinating design deliverables and ensuring consistency across organizational events.

FEATURED PROJECTS

- **Mercury:** Real-Time Demand, Pricing & Inventory Intelligence. A miniature decision-making platform for an e-commerce company.
- **Aegis:** Fraud Detection Platform. A program that can detect whether a transaction is suspicious based on the patterns they produce.
- **Lux:** Data Observability Platform. A platform for data quality validation, lineage tracking, pipeline monitoring, and downstream impact analysis.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, TypeScript, Python, SQL
- **Frontend:** HTML5, CSS3, React.js, Next.js
- **Backend & Databases:** Node.js, Express.js, PostgreSQL, Express.js
- **Artificial Intelligence & Machine Learning:** PyTorch, TensorFlow, skicit-learn, NumPy, Pandas,
- **Tools & Deployment:** Git, GitHub, Docker, Linux, Railway, Render, Neon
